Welcome To Collaborative Development Tutorial and Workshop

Discussion on Lecture 2

What is Agile?

01

Mindset

Agile is a mindset

02

Ability to Change

Ability to create and respond to change

03

A Practice

A practice that promotes continuous iteration of development and testing

Why Agile?

Flexibility & Adaptability

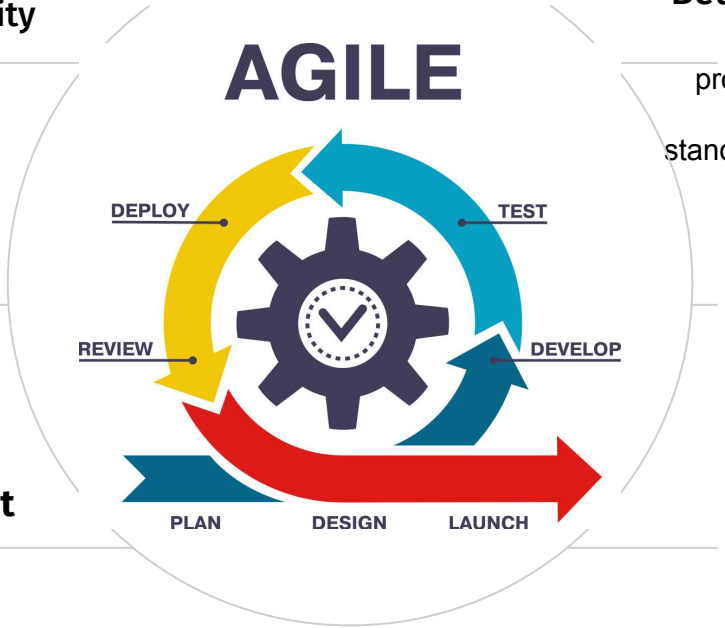
allows teams to **adjust project requirements**

Customer-Centric Development

prioritizes **user feedback**, ensuring that products align with customer needs

Faster Time to Market

Earth is the third planet from the Sun



Better Collaboration & Transparency

promotes **cross-functional teamwork** with daily stand-ups, sprint reviews, and retrospectives.

Reduced Risk & Improved Quality

Development happens in **small, manageable increments**, risks are lower

Agile Manifesto

01 Individual & Interactions

Over process and tools

02 Working Software

Over comprehensive documentation

03 Customer Collaboration

Over contract negotiations

04 Responding to Change

Over following a plan

The original Agile Manifesto

https://agilemanifesto.org/

Agile Principles

Customer Satisfaction

Changing Requirements

Frequent Delivery

Regular Communication

Motivated Individuals

Face-to-face meetings

Measure Outputs

Sustainable Development Processes

Technial Excellence & Good Design

Simplicity

Self-sufficient Teams

Continuous Improvement

What is SCRUM?

A Framework

A lightweight framework where people can work.

A Practice

Practice for creating complex project

A Base

A basis for every stakeholder

Why SCRUM?

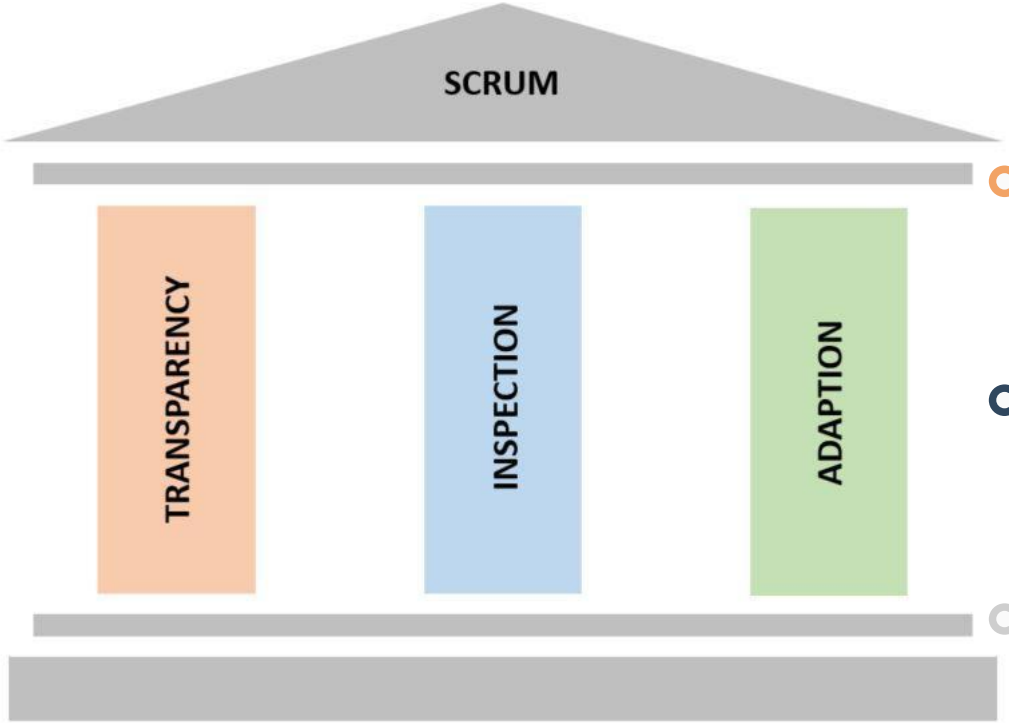
Simple to Understand

Flexibility

Adaptability

Light Weight

Scrum 3 Pillars



Transparency
Giving visibility to the significant aspect of the process to those responsible for the outcome

Inspection
Timely checks on the progress toward a sprint goal to detect undesirable variances.

Adaptation
Adjusting a process as soon as possible to minimize any further deviation or issues.

Scrum Values

Commitment

People personally commit to achieving the goals of the Scrum Team

Courage

Team members have courage to do the right thing and work on tough problems

Focus

Everyone focuses on the work of the Sprint and the goals of the Scrum Team

Openness

The Scrum Team and its stakeholders agree to be open about all the work and the challenges with performing the work

Respect

Team members respect each other to be capable, independent people

SCRUM Roles

Represents stakeholders and defines priorities.

Product Owner

Facilitates the Scrum process and helps remove obstacles

SCRUM Master

Work on assigned tasks to complete the project.

More About Agile in Next Week With Activity

Project Management Tool

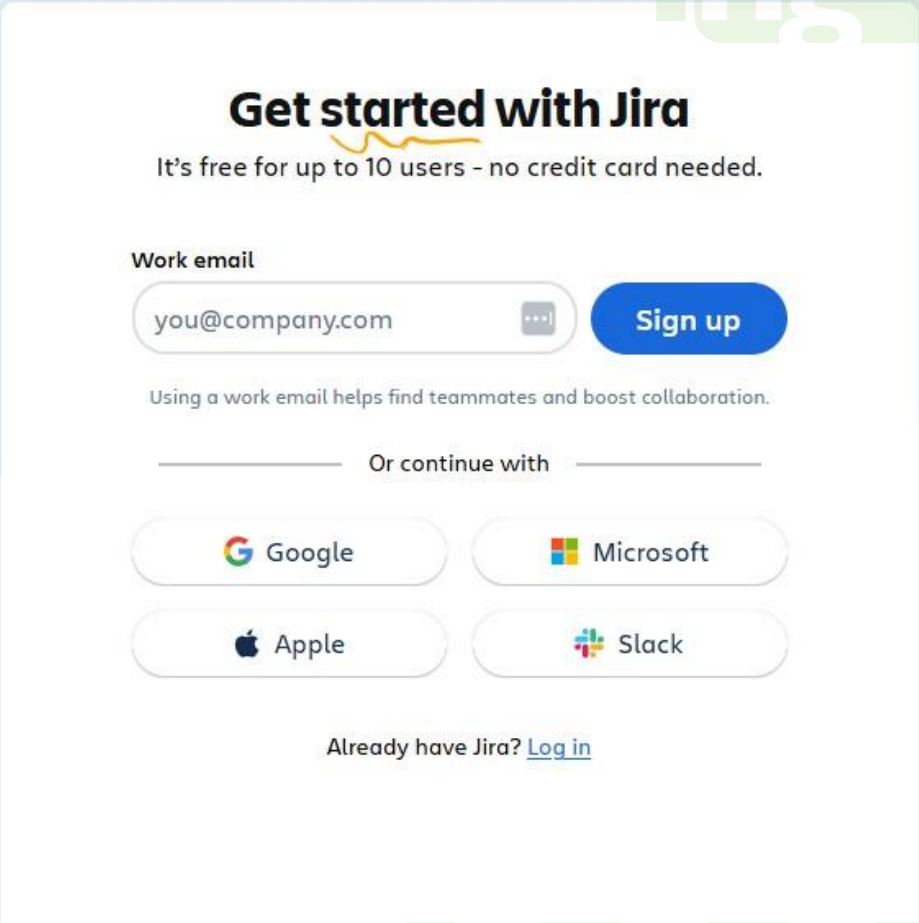
Introduction to JIRA

- JIRA is a project management and issue-tracking tool by Atlassian.
- Used by Agile teams for **planning, tracking**, and **managing** work.
- Supports **Scrum** and **Kanban** methodologies.

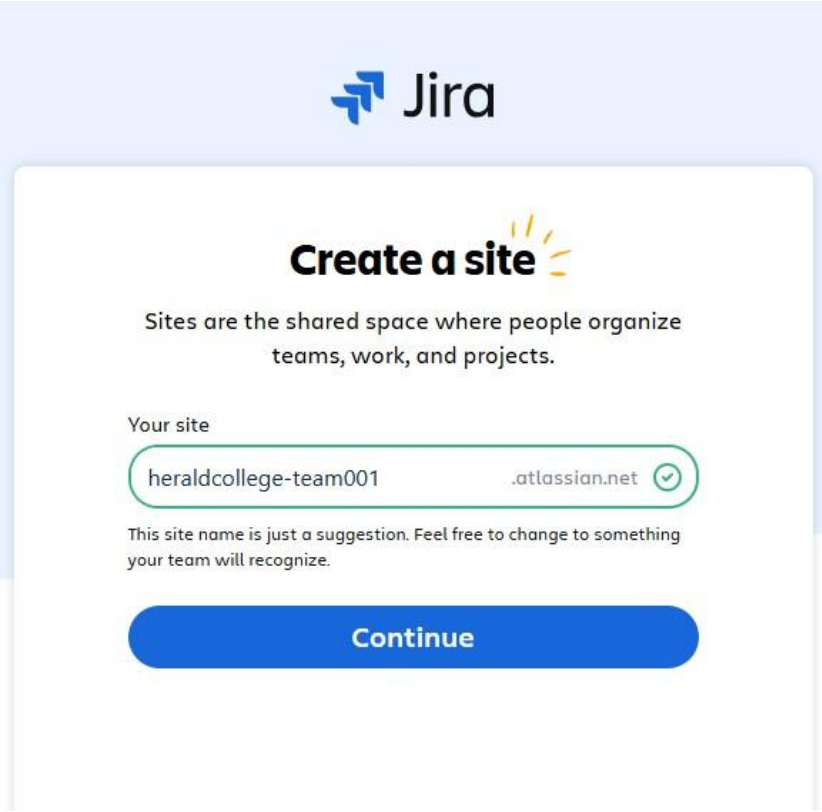
Signing Up for JIRA

Steps to create an account:

1. Go to *https://www.atlassian.com/software/jira*
2. Click **Get it free** or **Try Cloud for free**.
3. Sign up using your email and create a password.
4. Choose a **site name** and create your workspace.
5. Complete the initial setup by selecting **JIRA Software** as your prod



Sign up continue…



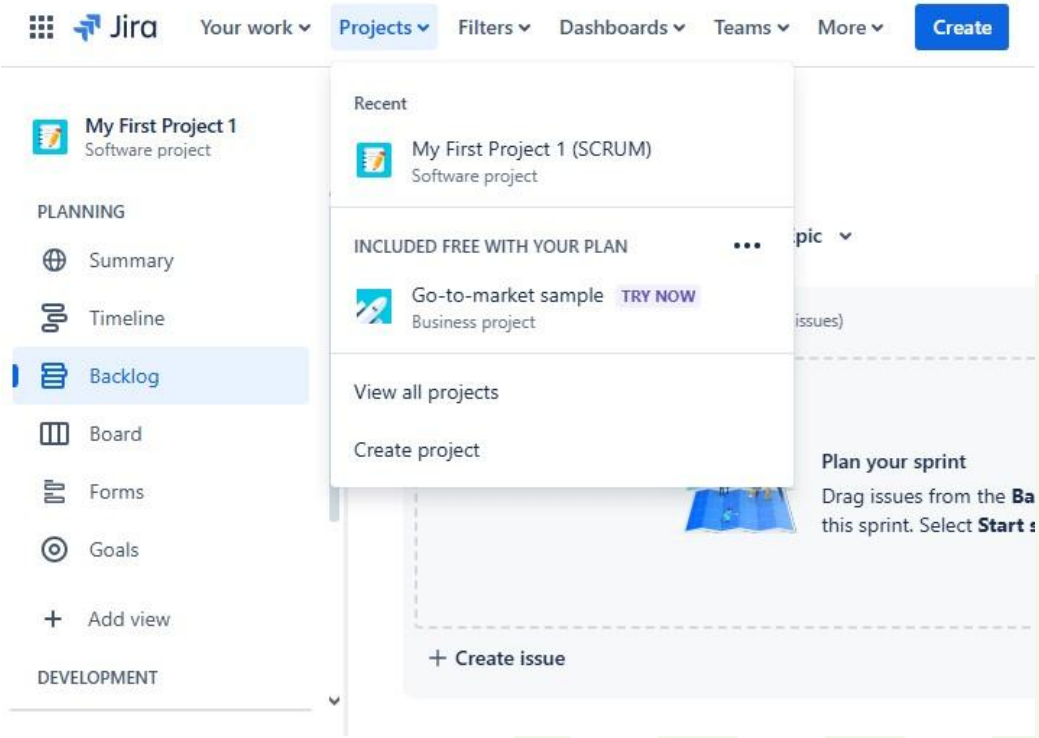
Creating a **site** will help you to organize your

- Team
- Work
- Projects

Creating a New JIRA Project

Steps to create a project:

1. Click **Projects** in the top menu.
2. Select **Create Project**.
3. Choose a **Template** (Scrum, Kanban, or Bug Tracking).
4. **Name** your project and configure settings.
5. Click **Create** to finalize the setup.



Understanding JIRA Boards

- **Scrum Board:** Best for sprint-based development.
- **Kanban Board:** Best for continuous workflow.
- **Key Features:**
  - Columns (To Do, In Progress, Done)
  - Drag & Drop Issues
  - Custom Filters & Rules

Choose a Template (Scrum, Kanban, or Bug Tracking)

Select a template to get started

You can always change this later. Selecting a template won't limit what you can do.

Project management

Kanban

Manage and track agile work plus integrate developer tools like GitHub

Project management

Designed to help business teams manage work with list and calendar views

Scrum

Plan, prioritize, and schedule sprints using scrum framework

Name your Project

Welcome!

Your first project is ready to kick off. It's where you'll track tasks across teams, turning big ideas into real outcomes.

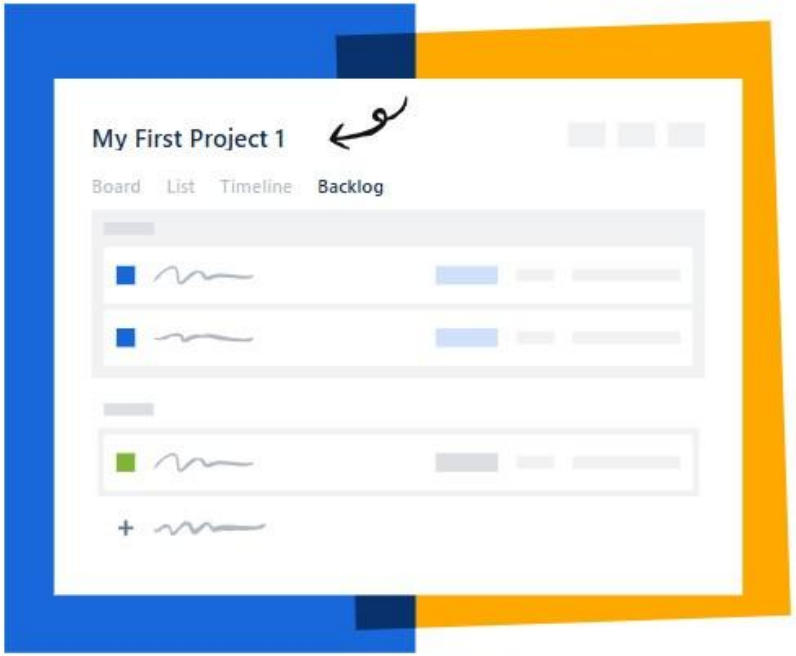
Name your project

My First Project 1

How familiar are you with Jira? *

- Not familiar
- Somewhat
- Familiar

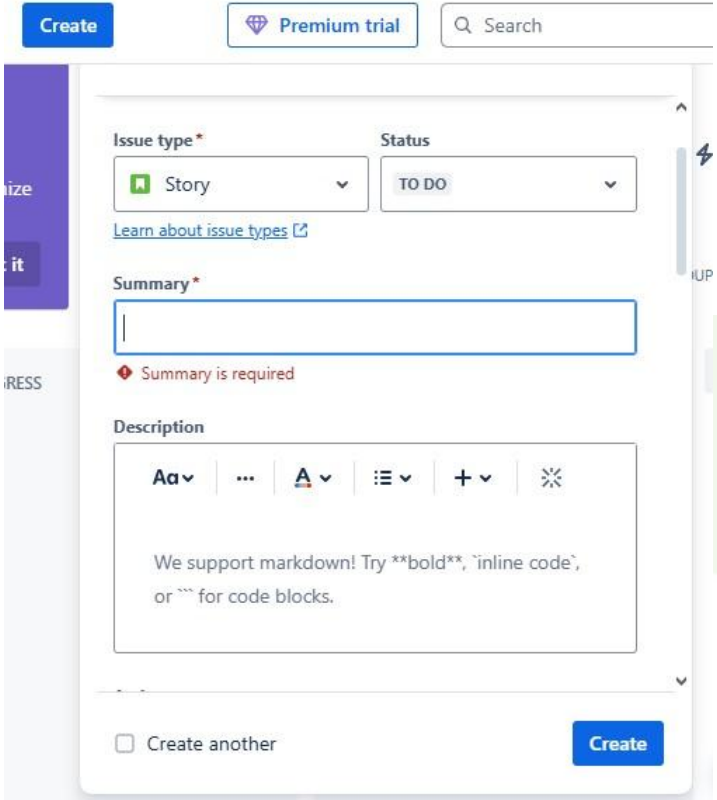
Get started



Creating Issues (Task, Stories, Bugs)

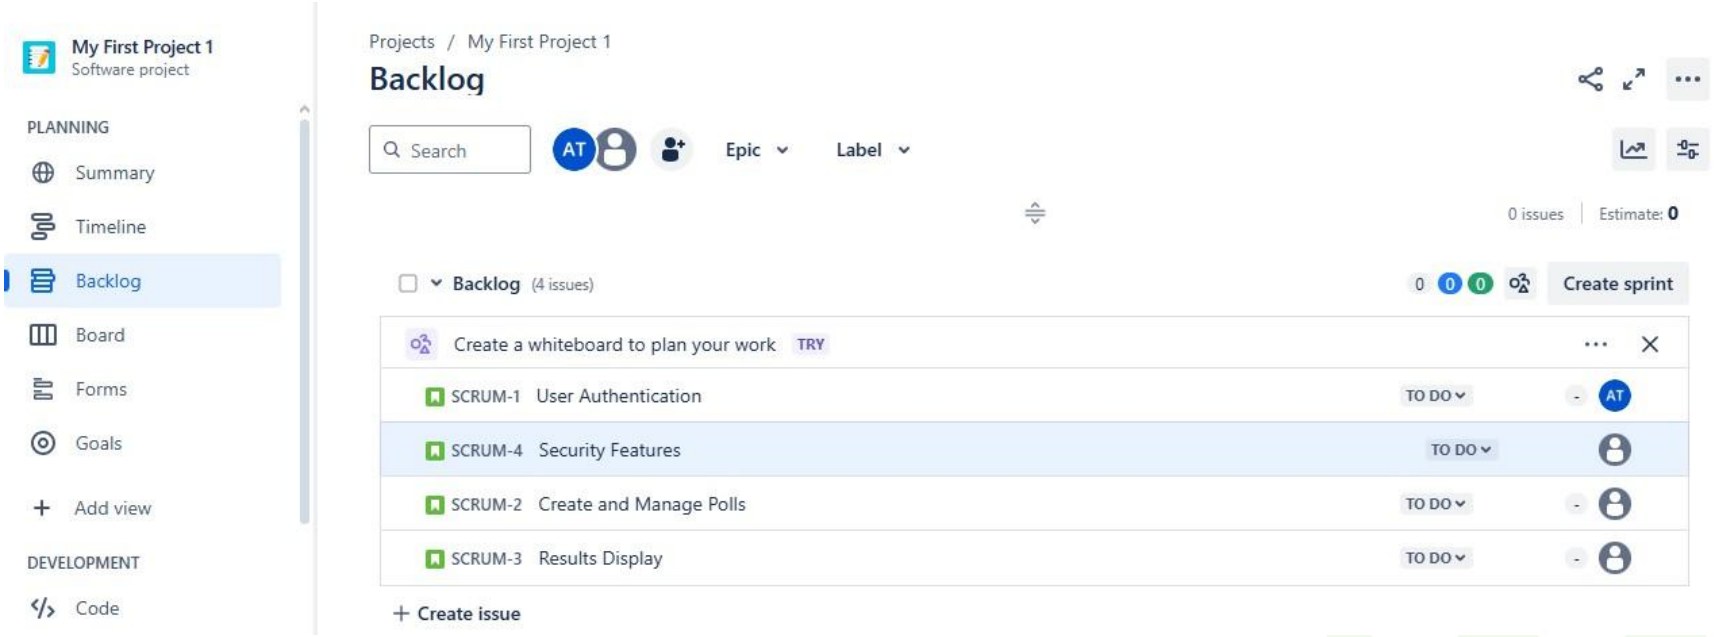
Steps to create an issue:

1. Open your JIRA project.
2. Click **Create** in the top navigation.
3. Select **Issue Type** (Story, Task, Bug, Epic).
4. Add **Title, Description, Assignee, Priority, and Labels**.
5. Click **Create** to add the issue to the backlog.



Organizing the Product Backlog

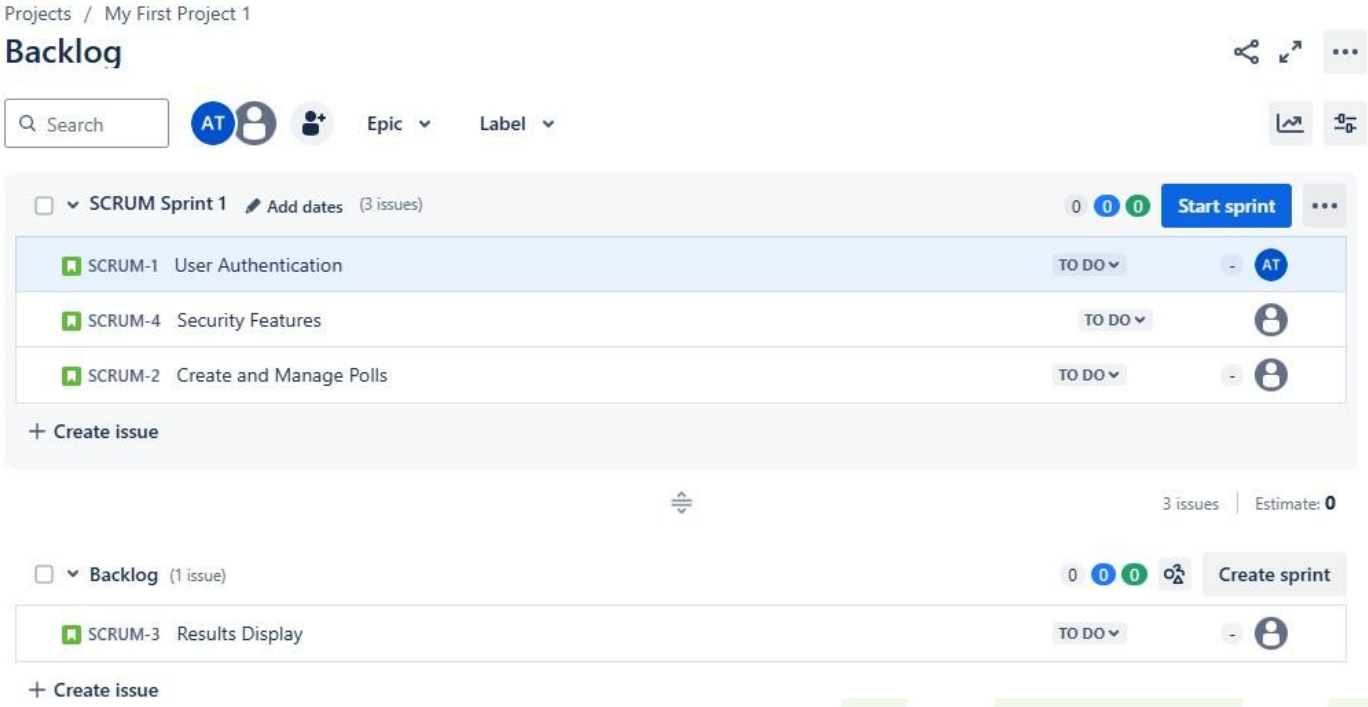
- The **backlog** contains all tasks, stories, and bugs for the project.
- **Prioritize issues** by dragging them to the top.
- Add details like **acceptance criteria, attachments, and comments**.
- Assign issues to team members.



Creating a Sprint

Steps to create a sprint:

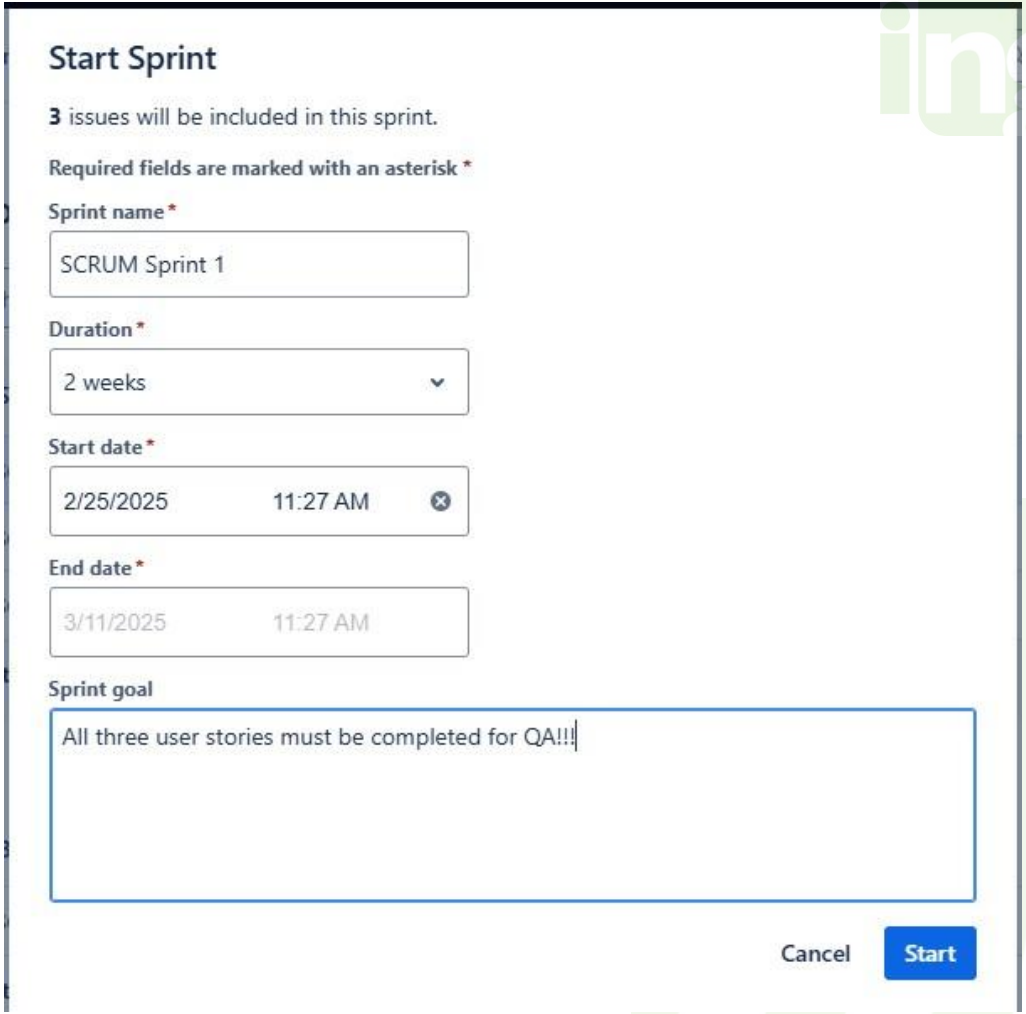
1. Navigate to the **Backlog** section.
2. Click **Create Sprint**.
3. Drag prioritized issues from the backlog into the sprint.



Starting a Sprint…

Steps to create a sprint:

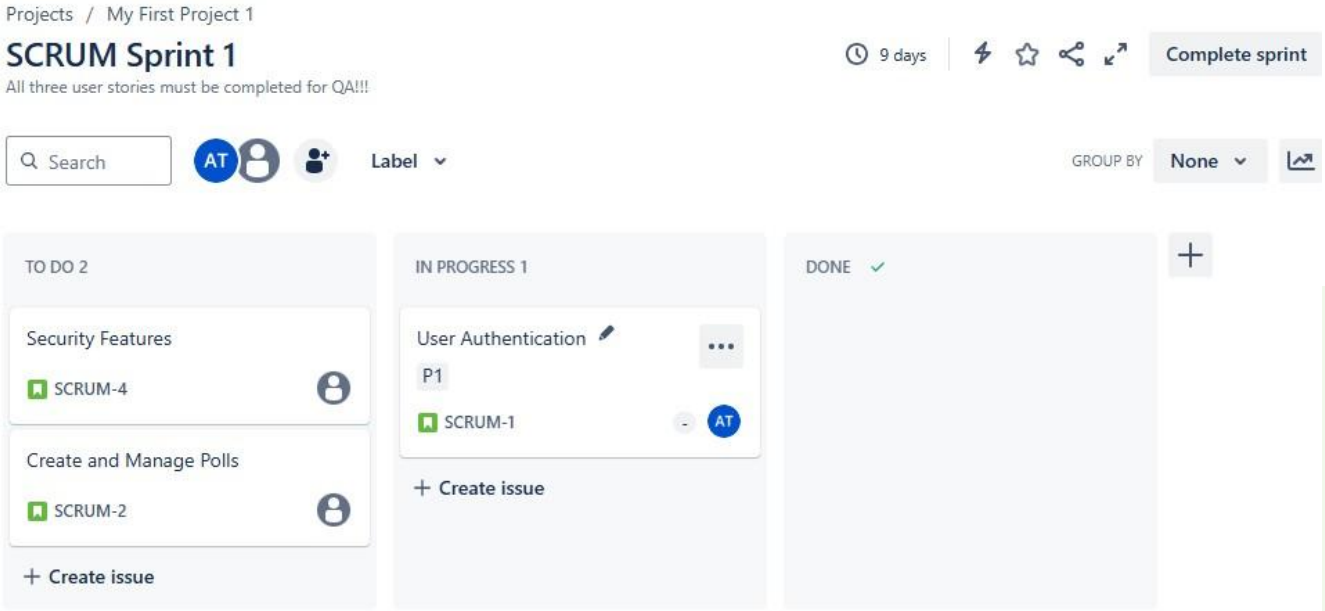
1. Click **Start Sprint** and set the sprint duration.
2. The sprint is now active, and team members can start working on issues.



Monitoring Sprint Progress

Steps to create a sprint:

1. Use the **Active Sprint** view to track progress.
2. Drag issues across the board as they move from To Do → In Progress → Done.
3. Use reports like **Burndown Chart, Sprint Report, and Velocity Chart**.



THANK
YOU!
